

Dementia care and support

At Dovida, we offer specialised Alzheimer's and dementia care services which help clients live their best life possible, in the place they are most familiar – their own home.

Living well with Alzheimer's and other dementias

Dementia care is a specialised type of home care, designed to create the best environment possible for someone living with dementia.

All of our caregivers are personable, qualified, and trained in dementia care.

Here are some examples of how we support clients living with dementia:

- Our themed activities programmes stimulate memory, benefit cognition and are great fun.
- Our living well plans encourage healthy eating and exercise, which in turn helps sustain brain health.
- We encourage people living with dementia to stay social and stay connected.
- We offer care management support, including home safety risk assessments, support with behavioural symptoms, and communication skills and planning ahead.

Why consider dementia care with Dovidá?

Dovidá supports, empowers and uplifts clients living with dementia in cities, towns and villages all over Ireland.
